

Good as new.

(and less expensive, too)

Do your contact pads need a make-over? Is the rubber worn off the corners, cracked or peeling? If the existing aluminum plate is in working condition, **Cascade certified re-bonding** is the perfect solution.

Here's how it works:

- You send us the contact pads. (We re-bond all Cascade Carton Clamp pads and most Multi-Purpose pads.)
- We strip off the old rubber and re-vulcanize the new rubber to the old aluminum plate.
- We ship the pads back. Lead time is two weeks from receipt of the pads. You pay the freight to and from Portland, Oregon.

before re-bonding

after re-bonding

We back our procedure with a 6-month warranty.
